

FAIR USED

1998 - VAC-TRUCK III

This pressure-vacuum installation is capable of vacuuming and blowing dry products.

TECHNICAL DETAILS

Construction	Vac-Truck
Tank Capacity	13 m3
Tank Material	RVS
Vacuum Pump	Roots blower
Max. Vacuum	85%
Max. Overpressure	1 bar
Extra	Design according to ADR standards
Chassis Type	DAF 8x4 95XF
First Registration	1998
Available	On request

USED FOR

- Cleaning oil tanks
- Sucking up residues
- Removal of contaminated material due to spills or emergencies
- Removal and transport of catalysts in the chemical and petrochemical industry
- Removal and transport of fly ash
- Removal of residues from production processes
- Removal of contaminated soil
- Cleaning and emptying of residues in silos
- Supply and removal of roof ballast (roof gravel/roof substrate)
- Supply and removal of insulation material in difficult to reach and narrow spaces
- Widening crawl spaces for installing pipelines and cables
- Supplying raw material for drainage purposes
